PERFORMANCE BULLETIN 131

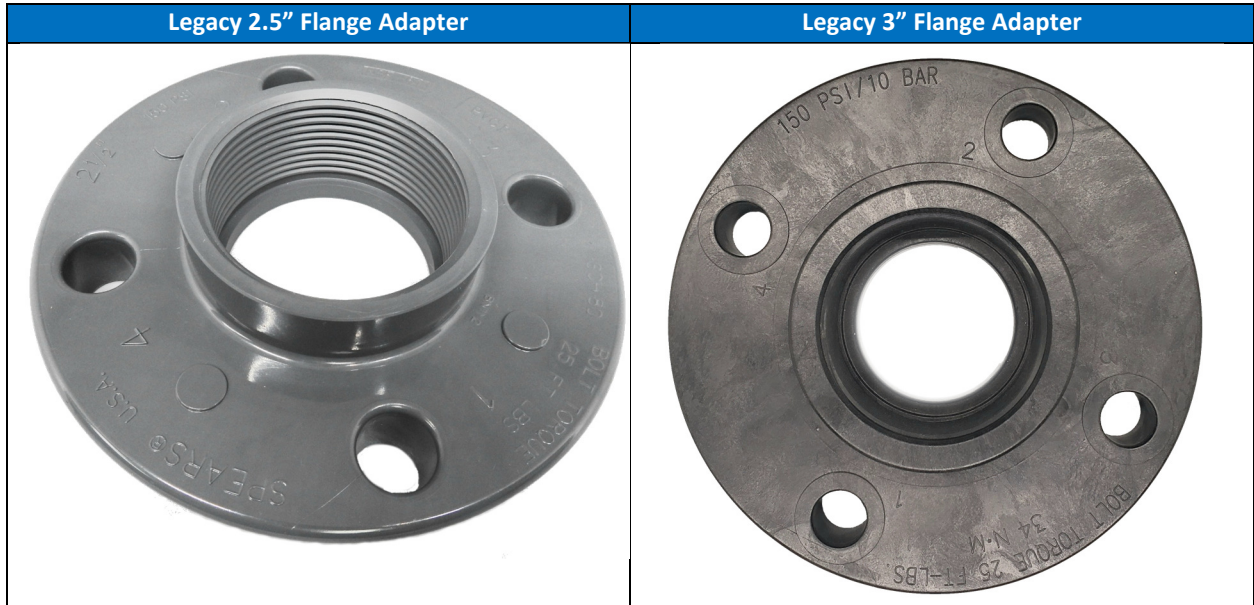

K526 Flange Adapter Consolidation

Flange adapters for the K526 valve have been consolidated into one version that can be used in both 2.5" and 3.0" applications. This change has eliminated the need for two separate flange adapters, and now the same Part Number can be stocked regardless of 2.5" or 3.0" connections. Part Number 1070252 KIT,526,2.5"/3.0" FLANGE will now include a set of dual-purpose flanges along with mating orings.

This is a kit acts as a direct replacement to PN 1070251 which was previously the 2.5" kit. Lay length of the valve is unchanged as a result of this update.
