PERFORMANCE BULLETIN 136
V424 & VAV4 Series Shaft Guide Update

Shaft Guides for 1.25" and 1.5" metal valves (V424 and VAV4) are being updated to use a new investment cast design. The fit, and function of the parts will remain unaffected and the new Shaft Guides will be fully interchangeable with the old.

The new style Shaft Guides will feature a 3/4" hex for easy removal and installation. This eliminates the need for special tool PN 1074227 to remove the Shaft Guide. The Shaft Guides will remain 303 Stainless Steel material. As a result of this update, the Part Numbers will be changed as shown below. Kits containing the Shaft Guides will not change Part Numbers. The update will be implemented when inventory of the current machined version is exhausted.
